## NISSAN INTELLIGENT MOBILITY

Nissan Intelligent Mobility guides everything we do. We're using new technologies to transform cars from mere driving machines into partners. Together, the journey is more confident, connected, and exciting. Whether it's cars that share the task of driving with you, or highways that charge your EV as you go along, it's all in the very near future. And it's a future already taking shape in the Nissan you drive today.

Nissan. Innovation that excites.

Question everything. Get better answers. The Nissan GT-R rewrites the laws of aerodynamics and makes the air your ally. ATTESA E-TS® All-Wheel Drive redefines supercar performance to give you thrills on various road conditions. It proves you can outperform purpose-built mid-engine exotics and have 4 seats, a handcrafted interior, and even a trunk. This is tech that breaks rules and shatters records. This is tech that moves.

## NISSAN GT-R NISMO

# BEYOND ULTIMATE

Ultimate Nissan vehicle, ultimate GT-R, ultimate supercar. And yet, it will never be enough. The GT-R has been refocused – lighter, more responsive, with enhanced aerodynamics. There may not be a word for beyond ultimate – but there is the new GT-R NISMO.

Under the hood, 608 ps is now more accessible with retuned turbos from our GT3 racing program, providing quicker response across the rpm range.

On the outside, the new carbon-fiber roof, hood, and fenders reduce weight and bring the center of gravity lower, closer to the center, enhancing stability and providing more responsive handling. New vents on the front fenders increase aerodynamic downforce for sharper turn-in.

Taking advantage of the exterior changes, new, lighter 20" NISMO wheels, new compound tires with greater grip, and a retuned suspension take handling to the next level.

Inside remains just as focused, with Recaro® seats, an Alcantara®-wrapped steering wheel with a red leather stripe at 12 o'clock, and signature NISMO red throughout the cabin, including the seatbacks, tachometer face, shift lever, and door handle pulls.

652 Nm of Torque

0.26 Coefficient of Drag

# nismo

Competition-proven stopping power. Bringing technology developed from racing, the Nissan Brembo® Carbon Ceramic Braking System delivers massive stopping power and enhanced fade resistance.

## HANDCRAFTED PERFORMANCE

Each GT-R engine is assembled by master craftsmen called Takumi – renowned for their dedication and mastery. With only five Takumi in the world entrusted with the honor, the plaque on the engine bearing their name has true significance. As one of the Takumi says, "We put our souls into each engine, hoping to deliver that excitement to customers."

570 PS

## MASTERY AT EVERY TOUCHPOINT

The GT-R's interior is a masterful blend of premium materials, from hand-stitching in the cabin, to a dashboard pad created from a single, hand-selected Nappa leather hide. Subtle etching on the aluminum bezels enhances their feel, while sport seats provide comfort and support, creating an ideal place to take it all in.

## AERODYNAMIC ALCHEMY

Rather than being confined by the demands of aerodynamics, the Nissan GT-R sculpts the air to its needs – becoming a force of nature, as much as a force to be reckoned with. Every aerodynamic detail was considered. A 1% energy loss around the C-Pillar was enough for the GT-R's fanatical engineers to redesign the pillar to create a cleaner design.

## A SHARPER FOCUS ON DRIVING

Taking advantage of the capabilities of Nissan GT-R requires your attention, but it should never feel like information overload. The GT-R's intuitive dashboard design makes access and use simpler, giving you more time to focus on what's important – the pure enjoyment of the drive.
